15 Years of Trust

GUARDIAN®
Powder Coatings

Built on trust

Guardian Coatings Private Limited was founded in 2012 by visionary technocrat Subbaiah Kantheti, with a clear purpose: to give South India a responsive, dependable, and customer-centric Powder Coatings partner. Driven by strong formulation expertise and a deep understanding of application environments, Guardian has evolved over the years into a trusted supplier across a wide spectrum of industries, serving OEMs, Job Coaters, and manufacturing enterprises throughout South India.

Our Vision is to become the most trusted and customer-focused Powder Coatings manufacturer in South India, combining global-quality products with unmatched responsiveness and technical partnership.

Leadership

SSubbaiah Kantheti, a visionary technocrat with over three decades of experience in the Powder Coatings industry, founded Guardian Coatings Private Limited in 2012 with a clear focus on quality, reliability, and customer-centricity.
Guided by his deep industry expertise and commitment to excellence, Guardian has expanded its capabilities and market presence, emerging as the largest manufacturer of high-quality Powder Coatings in Telangana and Andhra Pradesh.

GUARDIAN®

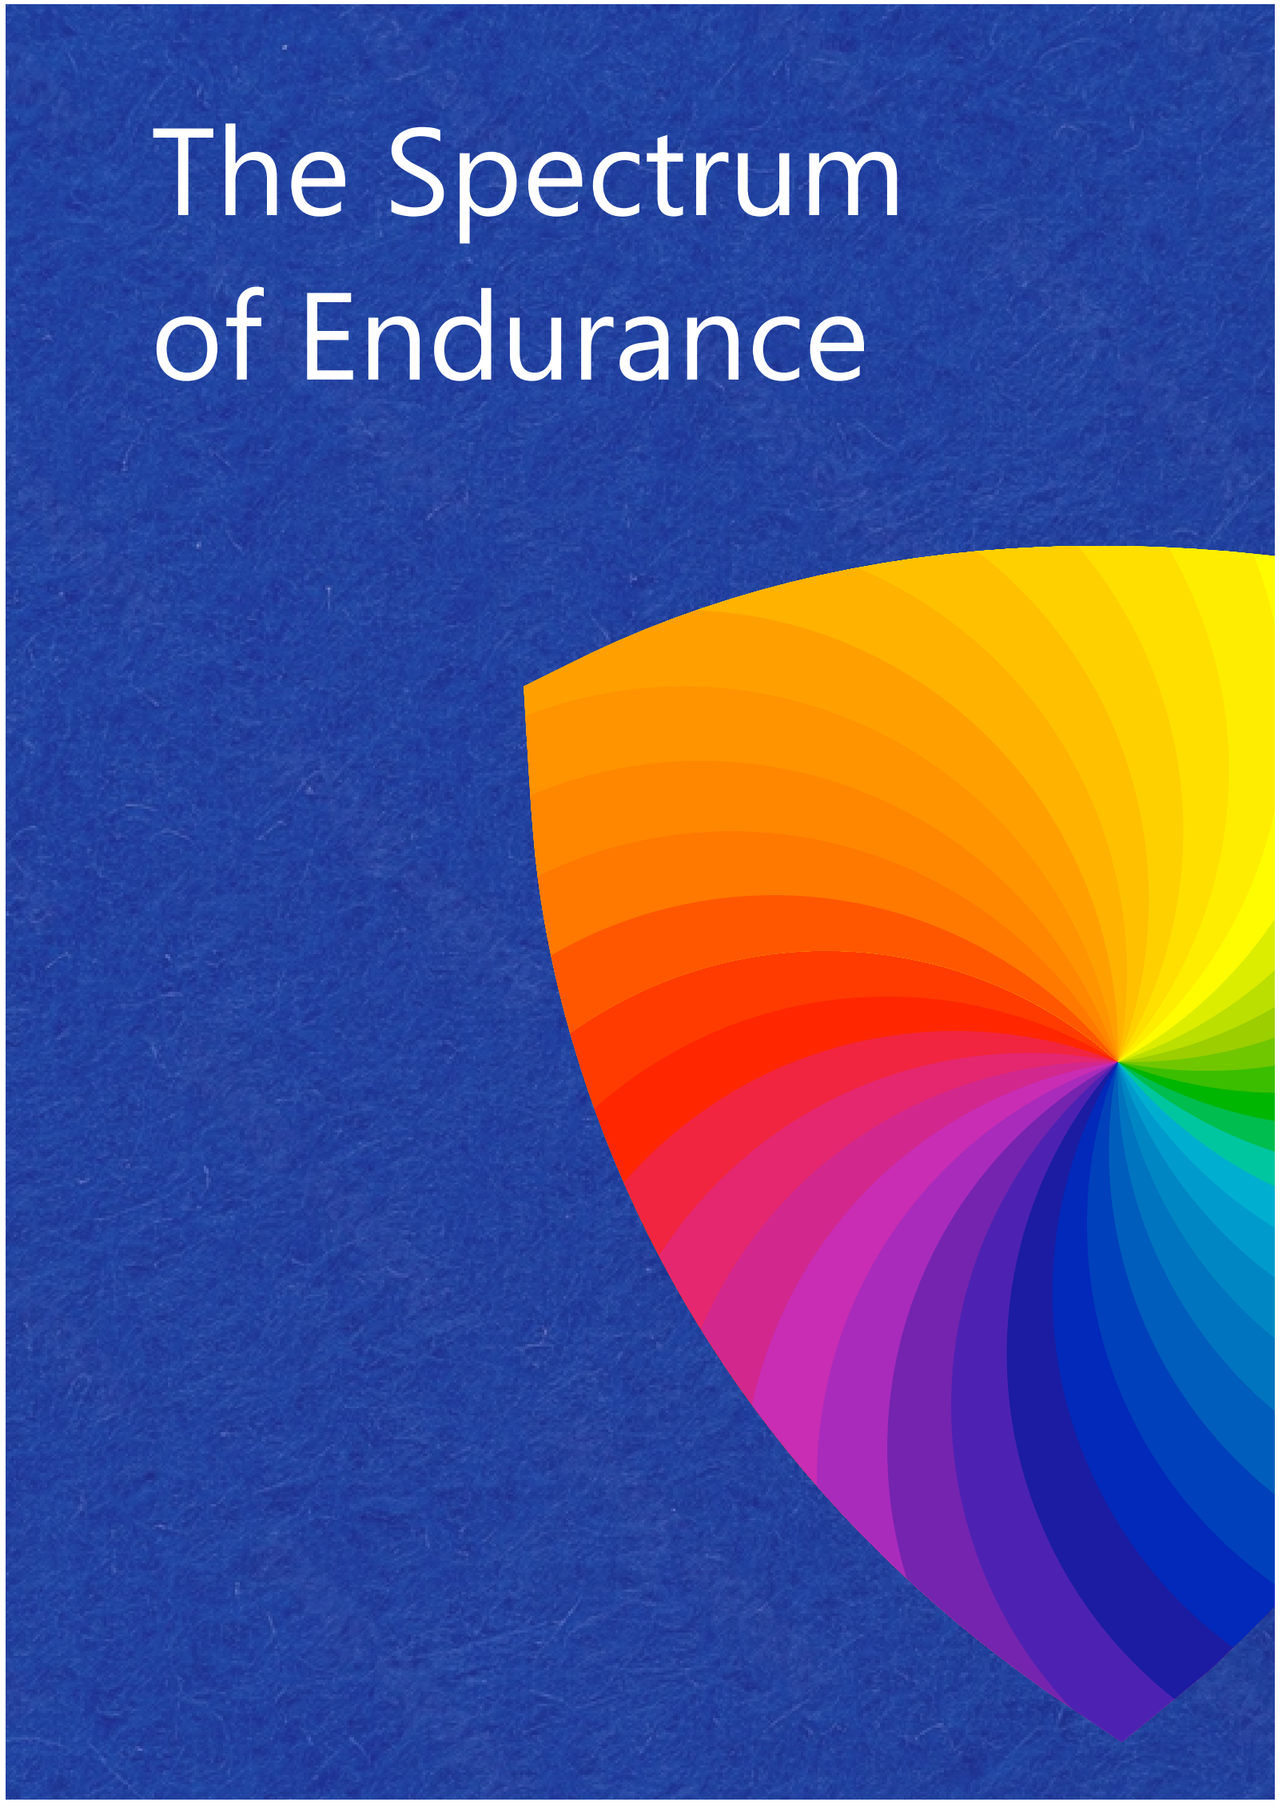

The finish that defines your brand.

Powder Coatings are not just a finish — they're the face of your product, the shield of your brand, and the promise of durability.

Strategically based in Hyderabad, Guardian serves customers across South India with greater speed, control, and accountability.

The Spectrum of Endurance

At Guardian, Powder Coatings are not treated as a commodity.
We do more than manufacture coatings — we support production performance, product quality, and brand confidence.

The Guardian Advantage

Innovation & Expertise

- In-house R&D facility for formulations, testing, and development
- Experienced technical team for research and customer support

Manufacturing Excellence

- Multiple production lines for small to large volumes
- Streamlined processes ensure speed and consistency
- Wide range of products and shades, readily available from stock

Customer-Centric Approach

- Direct engagement, no middlemen
- Competitive pricing tailored to requirements
- Troubleshooting support on customer production lines

Guardian is known for:

Industry-best yield per kilogram of powder

Excellent technical support (selection, custom formulations, on-site support, after-sales service)

Troubleshooting expertise — eliminating coating defects to your complete satisfaction

For OEMs and Custom Job Coaters this means:

Lower rejection and rework

Reduced inventory burden

Faster production cycles

Stronger finished-product appeal

Our Product Portfolio

Each Guardian coating is engineered to deliver performance you can see — and reliability you can trust.

Epoxy Powder Coatings

Ideal for demanding internal applications, these coatings combine excellent mechanical strength with a high degree of chemical resistance. Best suited for aggressive indoor environments, they are not recommended for exterior use.

Epoxy Polyester-Hybrid Powder Coatings

A balanced blend of epoxy and polyester resins, engineered to deliver both decorative appeal and protective performance across a wide range of internal components. They offer fast application, dependable overbake stability, and excellent colour and gloss retention. Like pure epoxy coatings, they are not recommended for exterior use

Pure Polyester Powder Coatings

TTough, attractive, and versatile, these coatings provide good weathering characteristics and exterior durability. Guardian's Pure Polyester formulations are available in both TGIC and TGIC-Free versions, making them suitable for interior and exterior applications.

Super Durable Polyester Powder Coatings

Developed specifically for architectural excellence, these high-performance coatings deliver exceptional durability, superior chemical resistance, and outstanding mechanical strength. Designed for aluminium and steel, they are ideal for both interior and aggressive exterior environments. Guardian's Super Durable range meets AAMA Specifications 2603 and 2604, ensuring long-lasting performance and premium quality.
With Guardian, you gain more than a supplier — you gain a responsive ally who supports your timelines, strengthens your competitiveness, and ensures your products leave a lasting impression.
